MADE FOR YOU

TWO INDEPENDENT TECHNOLOGIES: RF + NMS

WonderFace incorporates Neuromuscular Stimulation and Bipolar Radiofrequency through different applicators and completely independent modes.
Neuromuscular Stimulation targets the deep facial muscles.

Bipolar Radiofrequency produces controlled thermal heating aimed at improving the appearance, firmness, and aesthetic quality of the skin.

DEEP FACIAL MUSCLE STIMULATION

WonderFace is a professional aesthetic platform designed to target two fundamental elements of facial aging: muscles and skin.

Through specific protocols, it can target the forehead, periorbital area, cheekbones, nasolabial folds, facial contour, and submental area.

The face is not made up solely of skin. Beneath it lies a complex muscular architecture that determines its shape, volume, expression, and firmness.

WonderFace Neuromuscular Stimulation produces deep, controlled contractions, allowing facial muscle stimulation to be incorporated into professional rejuvenation, definition, and facial contouring protocols.

TECHNICAL SPECIFICATIONS:

TECHNOLOGIES: Independent Neuromuscular Stimulation + Radiofrequency

APPLICATIONS: Muscle toning, lifting, mandibular definition, double-chin reduction, under-eye treatment, forehead stretching, improved skin quality, and stimulation of collagen and elastin.

PULSE WIDTH: 230 - 1400 µs

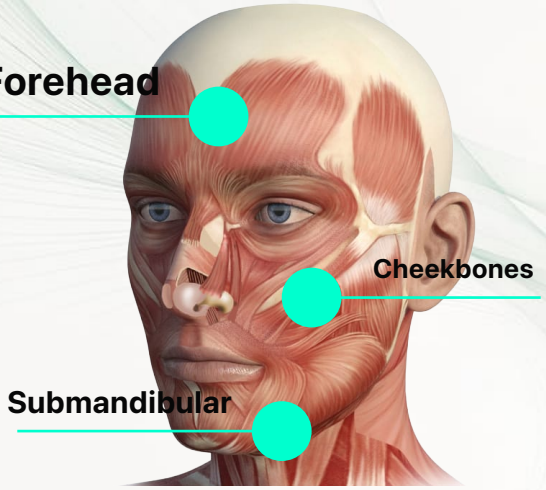

RF TYPE: 300 kHz planar resistive bipolar RF

RESULTS: From the second week

SESSION TIME: 25 Minutes

THREE AREAS SIMULTANEOUSLY:

- **Forehead:** Improves skin firmness and increases muscle tone.
- **Cheekbones:** Reduces nasolabial folds and helps prevent sagging.
- **Submandibular:** Helps reduce the appearance of a double chin.

UNPRECEDENTED TECHNOLOGY:

· **Deep facial rejuvenation:**
Radiofrequency generates heat in the deeper layers of the skin, stimulating collagen and elastin production.

· **Muscle stimulation:**
Neuromuscular technology tones and strengthens facial muscles, helping redefine contours and improve firmness.

· **Improved circulation:**
The heat generated by radiofrequency promotes blood circulation in the treated area, contributing to luminosity and a healthier appearance.

· **Non-invasive treatment:**
No incisions or downtime required, making it a safe, comfortable, and effective option.

· **Visible results:**
Firmer, more toned, rejuvenated-looking skin from the first sessions, thanks to neuromuscular technology and radiofrequency operating independently.

WonderFace helps aesthetic and longevity professionals overcome four major challenges:

1. **Differentiation**
2. **100% hands-free**
3. **Recurrence**
4. **Unique results**
